

SS Flexible hose for Bottom Loading Application

Specially Designed SS Flexible hose for Bottom Loading Applications

- SS316 Core
- Extra Wall thickness to ensure the hose is Robust and can withstand the Permanent Axial Forces that the hose is subject to due to the Application
- 20% extra corrugations to ensure flexibility and this makes the life of the operator easier to connect and disconnect the arm to the truck
- Long Length Ferrules to prevent over - bending of the hose during connection to the truck
- Double Braid assembly to give the hose additional strength
- Certified Welders by the Manufacturer
- SS Hoses manufactured to BS EN ISO 10380 and are fully compliant with the Pressure Equipment Directive PED/97/23 Annexure 1 Clause 3.1, accredited by TUV and audited as per AD 2000 HPO.
- Ex-Stock Availability
- Fully Certified
